Cross-State Examination Paper Leak Investigation — Incident Reports

Fictional investigative case file created for the ARGUS demonstration environment.

Case overview

Between February and August 2026, four examination-paper leak incidents were reported in West Bengal, Bihar, and Odisha. The incidents were initially handled as separate matters. Investigators later noticed recurring names, communication records, logistics activity, and financial references. The purpose of this investigation is to determine whether those overlaps represent a common operational network or ordinary business and professional contact.

EX-01 — West Bengal State Eligibility Examination

Date: 14 February 2026

Locations: Kolkata and Durgapur

A digital copy of the examination paper was circulated among a small group approximately 18 hours before the scheduled examination. The printing and dispatch trail shows material moving from SecurePrint Solutions in Durgapur toward Kolkata. Communication records place Arjun Mehta and Vikram Sethi in contact on the preceding day. The records do not establish why they communicated.

EX-02 — Bihar State Recruitment Examination

Date: 22 April 2026

Locations: Patna

A copy of the recruitment examination paper appeared in a private messaging group before the examination. Vikram Sethi and Neha Sharma communicated during the relevant period. A vehicle associated with Eastern Examination Services also appears in the wider travel records around the same date. The evidence does not establish who first obtained the paper.

EX-03 — Odisha Technical Recruitment Examination

Date: 9 July 2026

Locations: Bhubaneswar

A technical recruitment paper was circulated several hours before the examination. Karan Das and Neha Sharma appear in communication records around the incident. A RapidRoute Logistics vehicle was recorded near the examination-material warehouse. The vehicle presence alone does not establish that examination material was transported.

EX-04 — West Bengal Regional Recruitment Examination

Date: 18 August 2026

Locations: Asansol and Kolkata

Another examination paper was circulated before the scheduled examination. Dispatch records again reference SecurePrint Solutions and a logistics movement involving Arjun Mehta. The incident shares some communication

and logistics characteristics with EX-01, but investigators have not established whether the same people coordinated both incidents.

Investigative caution

These reports document observations and reported events. They do not establish criminal responsibility. Connections between people, accounts, vehicles, organizations, and incidents must be evaluated against their supporting evidence.
